

TransActive Drummer Wireless Practice/Monitor Amp for Electronic Drums

Play along with wireless audio from your Bluetooth device!

Created for today's electronic drummers, the TransActive Drummer Wireless is the perfect companion to your Alesis or any electronic drum set. The addition of wireless Bluetooth audio reception provides an ideal way for playing along to your favorite songs, or to practice using lessons downloaded to your Bluetooth device. Single-button Bluetooth pairing makes it simple.

INNOVATIVE DESIGN

The versatile TransActive Drummer Wireless is excellent as a stage amp, monitor, or practice amp. Recessed handles allow for easy transport, and the metal grille provides added protection. The angled front of the TransActive Drummer Wireless offers the correct monitoring position for the seated drummer. Nearly all connections are made on the back panel, keeping the top-mounted controls clean and clutter free for quick access during performance or practice.

BLUETOOTH BOUNTY

In addition to the Main and Aux inputs, the TransActive Drummer Wireless allows stereo reception from any Bluetooth equipped device. This unique addition is a powerful practice aid for any drummer. Download rudiments and lessons to your Bluetooth device, or improve your skills by playing along to your favorite tracks. A dedicated volume knob is provided on the top panel.
