

# Eden E Series Amplifier

Quick Start Guide

**E300**

**NEVER COMPROMISE™**

Thank you for choosing Eden.

We hope that this product provides you with not only years of faithful service, but also the inspiration and capability to take your music and express yourself in your own way.

At Eden we realize that having the right gear can mean the difference between having the confidence and ability to perform or not, so we strive to provide you with the tools that you need, whether at home, in the studio or in a stadium.

All of our Amplifiers, Speaker Cabinets, Speakers, and other items have been carefully designed and built to provide you with optimum performance and maximum flexibility, right down to component level. At Eden we work carefully to ensure that everything down to the last screw used in a product has been chosen to deliver the best possible product to you. In addition to using the best materials and processes, Eden is also conscious of the environment and works hard to do everything it can to minimize its impact on the world we live in while still giving you the premium equipment you should expect from us.

Please take time to read this quick start guide carefully before using your equipment. As with every piece of musical equipment how you use it will affect the results you can achieve. By taking 5 minutes to understand these guidelines you will not only ensure you get the best performance from your Eden product, but it may also prevent you from accidentally damaging your unit through improper use.

We hope you continue to enjoy your equipment and welcome any comments or suggestions you may have for Eden, after all, it is the creative inspiration of musicians and their music that drives all of us.

Thank you

The Eden Team

# CAUTION!

The equipment you have purchased has been developed to provide you with a tool to achieve great tone and in some cases deliver levels of volume that may be unsuitable for use in confined spaces or without hearing protection.

Every piece of Eden equipment is designed to perform exceptionally and just as with other high performance products can in certain situations be capable of operating at levels that may be outside of the requirements or capability of the user.

Use this equipment safely and considerately, the volume control on higher Wattage amplifiers is your responsibility. Your ears and those of others who are fortunate enough to hear you play are your most important instruments required to enjoy your music.

If you experience any hearing loss or discomfort when listening to any loud music or activity which involves excessive noise then for your own sake speak with a medical professional. As a Musician keeping your ears in good working order is as important as being able to play your instrument, you only get one set of ears!

Congratulations on your purchase of this E Series Product. It has been designed specifically to provide great bass amplification tone in a compact portable package that truly allows you to explore your instruments ability.

Designed to provide an easy to use feature set to maximize playing enjoyment while minimizing the amount of time you need to take to set up your sound. This short quick start guide provides hints to using your new amplifier product straight out of the box. For a more detailed and comprehensive guide visit the Eden website to view or download the expanded edition User Handbook.

## Product Support

Your Eden equipment has been designed to provide you with years of faithful service however should you ever need help with one of our products we have dedicated support teams all over the world. Visit your local Eden dealer or contact your regional distributor for more details. Alternately visit our website to see if you can find a solution [www.edenamps.com](http://www.edenamps.com)

### Simple rules to remember when using your Unit:

**DO:** Keep your unit clean and free from dust and obstructions to ensure adequate cooling and maximum performance.

**DO:** Ensure you use the best quality cables and connections when using your unit for peak performance.

**DON'T:** Use this unit with any power cable or cord that was not supplied by Eden.

**DON'T:** Store liquids on or near the unit during use or otherwise or store in an overly humid environment.

**DON'T:** Modify or attempt to modify your unit, there are no user serviceable components inside. Any modification or repair by an unauthorised technician will void any warranty offered in your region and can pose a serious risk of electrocution or death.

**DON'T:** Use your unit for any purpose other than for which it was intended.

**REMEMBER:** Follow all the warnings and instructions which are provided in this handbook, always keep this handbook for future reference.

Eden has tested or had the unit tested and approved for sale in your region. Any markings of approval and or warning labels on an Eden product are provided to ensure you as a user are aware of the efforts Eden go to ensure your product is suitable for use in your country. If you have any concerns about anything relating to your product then please contact Eden immediately.

Please check your individual unit for the relevant markings and symbols which may apply.
