

SZ-ISOBALL

SubZero Acoustic Isolation Ball

USER MANUAL

MAIN FEATURES

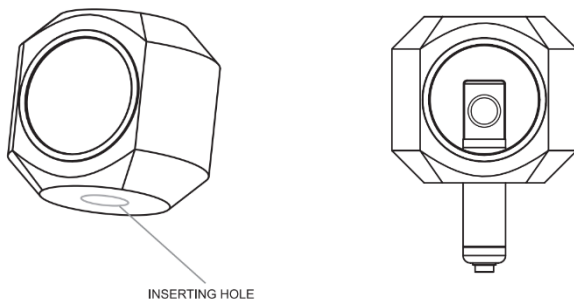

Isolate Your Vocal Recordings Anywhere
Reduces External Noise
Optimise the Quality of Your Vocal Taken
Made from High Quality Foam
Integrated Windscreen

GENERAL DESCRIPTION

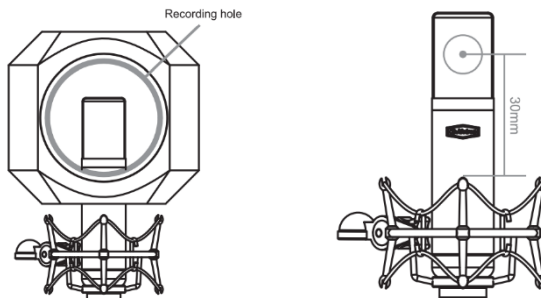

The SubZero Acoustic Isolation Ball is the ideal accessory for recording vocals, especially when recording on location. Made of high quality foam, the SZ-ISOBALL is perfect for reducing reflections and external noise, leaving you with clean and uncoloured recordings. The SZ-ISOBALL fits most condenser microphones and comes with a detachable windscreen, offering high quality recordings for producers and recording engineers.

INSTRUCTIONS

Make sure your microphone has a diameter between 48-58mm. Insert microphone into the base, capsule first. The windscreen cover over the recording hole is detachable.

The microphone capsule should be aimed towards the recording hole. The distance between the shockmount and capsule of the microphone should be larger than 30mm otherwise the SZ-ISOBALL will cover your microphone, hindering the quality.

SPECIFICATIONS

Length - 172mm
Width - 200mm
Height - 180mm
Inserting Hole Diameter - 47mm
Weight - 122g
