

MM-1 DISTORTION

Precautions

PLEASE READ CAREFULLY BEFORE PROCEEDING

Power supply
Please connect the designated AC adapter to an AC outlet of the correct voltage.
Please be sure to use only an AC adapter which supplies 9V(+/-10%)DC,center minus. The maximum working voltage not exceed 12V,otherwise may be dangerous equipment damage,fire or other problems.
Unplug the AC power adapter when not using or during electrical storms.

Connections
Always turn off the power of this and all other equipment before connecting or disconnecting ,this will help prevent malfunction and / or damage to other devices.
Also make sure to disconnect all connection cables and the power cord before moving this unit.

Handling
Do not apply excessive force to the switches or controls.
Do not let paper,metallic,or other objects into this unit.
Take care not to drop the unit,and do not subject it to shock or excessive pressure.

Cleaning
Clean only with a soft,dry cloth. If necessary ,slightly moisten the cloth.
Do not use abrasive cleanser,cleaning alcohol ,paint thinners,wax,solvents.
Cleaning fluids,or chemical-impregnated wiping cloths.

Interference with other electrical devices
Radios and televisions placed nearby may experience reception interference.
Operate this unit at a suitable distance from radios and televisions.

Location
To avoid deformation,discoloration,or other serious damage,do not expose this unit to the following conditions;
.Direct sunlight
.Heat sources
.Magnetic fields
.Extreme temperature or humidity
.Excessive dusty or dirty location
.High humidity or moisture
.Strong vibration or shocks

Main features

- .A hot-rodded classic circuit
- .Roars with huge amp stack tones and old school distortion
- .Delivers soaring lead and rich, saturated rhythms
- .True Bypass

Effects Explanation

- .Normal: Normal Distortion mode, undulating electricity sound.
- .Crunch: Boosts the dynamic range and harmonic content of distortion

Panel Instruction

1. On/Off Switch: Change the status of the effects from Off to On.
- 2.ON/OFF LED: Instructs effects or bypass status of M2, when the LED is lit up, the effects is on
- 3.DC Input Jack: For power supply, use a 9-volt DC regulated AC adapter(plug polarity is positive on the barrel and negative in the center)
- 4.INPUT Jack: 1/4" mono audio jack. For connecting guitar
- 5.OUTPUT Jack: 1/4" mono audio jack, outputs the signal
- 6.Tone Knob: Controls the color of distorted signal
- 7.Model Switch: Switches between Normal mode and Crunch mode
- 8.Distortion Knob: Controls the amount of distortion
- 9.LEVEL Knob: Controls the level of distortion

Specifications

Input: 1/4" monaural jack (impedance: 1M Ohms)
Output: 1/4" monaural jack (impedance: 6K Ohms)
Power Requirements: AC adapter. 9V DC (center minus plug)
Current Draw:
LEDs Off: 2.5mA
LEDs On: 6mA
Dimension: 46 (W) *94 (D) *50 (H) mm
Accessories: Owner's Manual

Disclaimer: Any specification's update won't be amended in this manual
