

MODE MACHINES MM-1

The MM-1 of the german manufacturer MODE MACHINES is a guitar/bass-effect pedal with a main focus on distortion. Through separate knobs for tone, distortion and level you can get the best tune for every situation. In the standard mode it delivers an undulating electricity sound and by switching into crunch mode, the dynamic range and harmonic content of distortion gets boosted. All in all, it provides you with huge amp stack tones and old school distortion but also lead and rich saturated rhythms.
