Thank you for purchasing the SubZero SZ-IH100 Ear Defenders.

To help you get the most out of your new product, please read this manual carefully.

MAIN FEATURES

Effective noise reduction in noisy environments

Reduces up to 21db of sound

Comfortable earmuffs for long wear time

Adjustable headband

INSTRUCTIONS

The lightweight SubZero SZ-IH100 Ear Defenders are ideal for musicians that are regularly exposed to loud music. The built in attenuation helps reduce sound levels for a more comfortable and prolonged practice session or performance. The attractive and subtle black design mean that they are also suitable for use on stage.

For the best ear protection, the ear cushions should be sealed firmly against the head, anything that interferes with this may decrease the level of protection. This could include things like long hair over the ears, eye glasses or other headwear.

Do not bend or reshape the adjustable headband as this will cause a loose fit and create sound leakage.

Test Frequencies (Hz)	125	250	500	1000	2000	4000	8000	SNR
Mean Attenuation (dB)	10	15	18	21	20	20	19	17.5dB
