

SOUND ISOLATING[™] EARPHONES

SE215 Internal Component View

SE215 COMPONENTS

Rugged Ergonomic Housing

Ergonomic and stylish design features durable, sweat-resistant construction; built to withstand the extremes of on-stage or everyday wear.

Single Dynamic MicroDriver

Delivers detailed sound with enhanced bass in a very small size.

D

A

Acoustic Seal

Prevents audio leaks from front to back cavity for proper acoustic performance, and provides additional shock protection for the MicroDriver.

Driver Support Frame

Protects the MicroDriver from sudden impact and holds it securely in place.

B

MMCX Micro-Miniature Coaxial Connector

Gold-plated connector has a lock-snap mechanism allowing 360 degree rotation for comfortable fit.

Nozzle

Specially angled tube ensures efficient audio delivery and ergonomic fit.

Detachable Cable

Allows for easy replacement or customization. Kevlar[®] reinforced for durability, and wireform fit ensures secure placement over the ear.

Sound Isolating[™] Sleeve

Selection of foam and flex sleeves create a customized fit and comfortable seal that blocks background noise.
