About Pedalboard and Gigboard

Guitar FX and Amp Modelling Processors Powered by the Exclusive Eleven® HD Expanded™ DSP Software.

Featuring a finely-tuned quad-core processor and powered by exclusive Eleven HD Expanded DSP software, the HeadRush Pedalboard and Gigboard deliver the most versatile, realistic sounding and responsive amplifier, cabinet, microphone and FX models ever found in a road ready floorboard guitar FX processor. The 7-inch touch display enables you to touch, swipe and drag-and-drop to instantly create and edit your rigs in an unprecedentedly realistic and intuitive way.

Plus, both models feature gapless preset changes with reverb and delay tail spillover, a built-in looper with 20 minutes of record time, the ability to load custom impulse response files and exclusive original boutique effects that can't be found anywhere else. Whether you're looking for a classic warm vintage amp with natural tube drive, wide ambient stereo delay textures with infinite feedback or the heaviest of heavy djent tone, the HeadRush Pedalboard and Gigboard cover it all and everything between.
