

SIZING GUIDE

Choosing the Correct T-Loks for Your Drums

1

DETERMINE DRUM TYPE

Choose TLD SERIES for all DW and PDP brand drums; choose TL SERIES for all other brands

**DW/PDP DRUM****STANDARD DRUM****2**

DETERMINE HOOP TYPE

T-Loks fit two types of hoops. Triple Flange and Die Cast. Compare your drum to the images on the right >>

**TRIPLE FLANGE****DIE CAST****3**

DETERMINE SHOULDER DEPTH

Choose the T-Loks that best fit over the unthreaded shoulder of the tension rod, while allowing the T-Loks to be securely threaded and tightened against the bottom of the hoop.

NOTES:

The TL/TL-2 is the most common size used for toms and snares. The TL/TLD-mini can be used only when the tension rod is fully threaded (no shoulder).
