

## Caution

Select an appropriate area to mount the screen. Make sure the position selected will not interfere with existing features of your room; wall sockets, switches, etc... These should be avoided.

DO NOT install the screen over an electrical outlet or switch. Doing so poses a serious fire hazard.

For homes with stud-wall construction, use stud finder or carefully measure to determine where the studs are located in the wall. The screen **MUST** be mounted to the studs- NEVER rely on gypsum board, drywall, or thin wall materials to support the weight of the screen!

Carefully open the package and lay out all the parts on a clean, flat surface.

Use extreme caution when unpacking the screen, do not use knives or sharp objects to open the packing boxes.

Do not unpack the screen material before finishing assembling the frames.

## Care and Cleaning

Your new screen can be effectively cleaned with a soft cloth using mild soap and water. DO NOT use harsh detergents, chemicals, distilled spirits or petro-chemicals to clean the screen; doing so may result in severe damage to the screen or the frame coating.

If the felt covering on the frame gets dusty or covered with lint, use a household vacuum cleaner with a brush or furniture cleaning attachment to clean the felt. We do not recommend using excessive amounts of water on the felt.

# Mounting Instructions

## Fixed Frame Projection Screen

### Parts:

After Installation please store instructions for future reference

According to the surface of installation, choose the appropriate screws needed for mounting (use mounting screws for wood surfaces, use mounting screws and concrete anchors for concrete surfaces).

### Tools Required

1

Line up the parts shown in the diagram above.

2

Connect the corner pieces to all four sides.

3

Affix the screws to the corners to hold the sides together.

4

Flip the screen over. Slide the rods through all four edges of the screen.

5

Install the springs on the four corners and middle position of each side first.

6

Install the remaining springs one by one in order.

7

Screw in all four brackets.

8

Measure the horizontal and vertical positions of the bracket locations on the screen.

9

Use your measurements from step 8 to correctly locate the wall section of the bracket and mark locations for fixing / drilling.

Fix the wall brackets using appropriate fixings. If you are in any doubt we recommend contacting a professional.
