

## WB 201 Wall Bracket Mounting instructions

The wall bracket can handle weight up to 5 kg/11 lbs.  
Follow the mounting procedure below:

1. Assemble the upper part to the speaker using the enclosed screw.
2. Mount the lower part on to a fixed wall.
  - a) Use suitable screws for wooden walls.
  - b) Use suitable screws for drywall and thin walls.
  - c) Use suitable screws for concrete and brick walls.
3. Join the upper and lower parts, select a suitable speaker angle and tighten the screw.

**NOTE!** Wall fixation screws and plugs are not included.  
It is up to the end user to select the correct screws.  
This wall bracket is exclusively designed to be used for mounting loudspeakers.
