About	Our original and best-selling Guitar Capo. Simply squeeze it into place and it stays there, giving you complete control over positioning and the amount of tension on the strings.	So small and light, you'd hardly know it was there! Easily applied and removed using the quick-release lever, while the screw adjusts the tension – even with the capo in position.	Spring-loaded for ultra-fast changes on stage. Unlike our other capos, you can't adjust the tension – but you can operate the capo easily with one hand.	Slimmer and lighter than the original Performance Capo, and featuring a smaller, reversed patented clutch mechanism, for a lightning fast squeeze-on, squeeze-off action. Stores behind the nut or on the peghead when not in use. .

Weight	76g / 2.7oz †	43g / 1.5oz	37g / 1.3oz	52g / 1.7oz
Size & Shape	Larger than the Newport Capo, but with comfortable rounded edges – should stay out of the way of most players' hands.	The smallest of the three capo models. Slim, and rounded, so you'll hardly know it's there.	The largest of the three capo models.	Slightly larger than the Newport Capo, with a sharp new appearance.
